About Me

Professional Overview & Background

AI Engineer and Software Architect specializing in autonomous systems, machine learning, and innovative technology solutions.

My expertise spans the full spectrum of AI development, from research and prototyping to production deployment of large-scale systems. I thrive on complex challenges and am particularly drawn to projects involving autonomous agents, real-time systems, and innovative human-AI collaboration.

Core Competencies

AI & Machine Learning

Advanced ML systems, neural networks, autonomous agents

Software Architecture

Scalable systems, microservices, cloud-native design

Real-time Systems

High-performance computing, edge deployment, optimization

Research & Innovation

Experimental AI, emerging technologies, R&D leadership

Quick Facts

Location	Tasmania, Australia
Availability	Open to opportunities
Focus	AI & Autonomous Systems
Approach	Innovation-driven

Areas of Interest

Autonomous Agents Neural Networks Distributed Systems
Edge Computing Human-AI Interaction Sustainable Technology

Professional Experience

Career Journey & Key Roles

AI Engineer & Software Architect

Independent Consultant 2020 - Present

Specializing in autonomous systems, machine learning, and innovative AI solutions for complex technical challenges.

- ▶ Developed advanced AI systems for autonomous decision-making
- ▶ Architected scalable software solutions for real-time processing
- ▶ Led research initiatives in human-AI collaboration

Python

TensorFlow

PyTorch

JavaScript

Docker

Kubernetes

AI Innovation Excellence

Recognition for groundbreaking work in autonomous AI systems and human-machine collaboration.

2024

Open Source Contributor

Active contribution to various open-source projects in AI, automation, and developer tools.

2020-2024

Technical Leadership

Successfully led multiple high-impact technical projects from conception to deployment.
