👤 About Me

Professional Overview & Background

AI Engineer and Software Architect specializing in autonomous systems, machine learning, and innovative technology solutions.

My expertise spans the full spectrum of AI development, from research and prototyping to production deployment of large-scale systems. I thrive on complex challenges and am particularly drawn to projects involving autonomous agents, real-time systems, and innovative human-AI collaboration.

Core Competencies

Accessibility Controls

Quick Facts

Location	**Tasmania, Australia**
Availability	**Open to opportunities**
Focus	**AI & Autonomous Systems**
Approach	**Innovation-driven**

Areas of Interest

Autonomous Agents   Neural Networks   Distributed Systems   Edge Computing

Human-AI Interaction   Sustainable Technology
